Large Screen – <https://wireframe.cc/LbXrEt>

Menu

Mobile – <https://wireframe.cc/erFJ28>

Large Screen – <https://wireframe.cc/1H04za>

Contact

Mobile – <https://wireframe.cc/MiJHu9>

Large Screen – <https://wireframe.cc/LGy065>

Notes:

My four additions include the Jumbotron on the Home Large-screen, light-box for the menu items pictures, Google maps on the home and contact pages, and the sticky footer on all pages.

As for the requirements, there will be semantic tags (head, nave, footer, etc.). There are two unique views for both mobile (<768px) and larger screen (>1200). In addition there will be more than four images on the Menu pages.

I will be using the bootstrap framework to create this page.
